

COURSE OBJECTIVES

The objective of this workshop is to acquaint participants with the value methodology and its function-oriented, decision-making process.

WHY THIS COURSE ?

To understand what value engineering actually entails, and how it can be best implemented, the course will address key issues and topics around the subject. It offers professionals an opportunity to debate and define the methodology, various tools, and solutions that value engineering utilizes in enhancing value.

HOW VALUE ENGINEERING IMPROVES EFFICIENCY

VE can make a considerable difference to the success of a project and a client's deadline. It has been highly adopted by professional organizations like Saudi Aramco, SABIC, RCJY....etc.

It has emerged as a divisive issue in the construction industry with advocates debating over its validity in reducing costs and improving efficiency and operations in projects.

ABOUT SAVE INTERNATIONAL

SAVE International®, the premier and sole international society devoted to the advancement of Value Methodology, It offers various education&networking opportunities.

HOW SHOULD ATTEND ?

Individuals planning to become a Value Methodology Associate (VMA) or Certified Value Specialists (CVS®) are encouraged to attend.

Attendees may include corporate leadership, engineers of all types, marketing, finance, quality & manufacturing disciplines.

STRENGTHS OF THIS COURSE

Becoming a certified VMA from SAVE International after 5 days only. Learning VE secrets & professional tools to get you started on your journey to reduce projects' costs without sacrificing quality.

Learning a technique has demonstrated its effectiveness in enhancing the project's value and optimizing life-cycle cost. The workshop is practical, so you'll learn something that is not academic or book knowledge and gain actual practical experience using what you learn.
